With our new headquarters next to Stuttgart Airport we have a perfect infrastructure to supply our customers as fast as possible.

Metzger
Autoteile

33

since 38 years...

We are a family owned company, that places great significance on partnership and team spirit within the company, and also in cooperation with our customers and suppliers.

Customer orientation, motivation and continuity are not only catchwords, but are also part of our corporate philosophy, which is supported by more than 125 qualified and motivated employees.

A constant communication within the team as well as with our suppliers and a precise market investigation guarantee a stable, high quality and attractive range of products.

Having developed our export department a few years ago we are now selling worldwide.

We take pride in the training and qualification of highly motivated and qualified Metzger staff. As a consequence we consistently hire and self-train the next generation.

With our new company building we have set the course for a healthy future.

You can recognize us by the black and red packaging

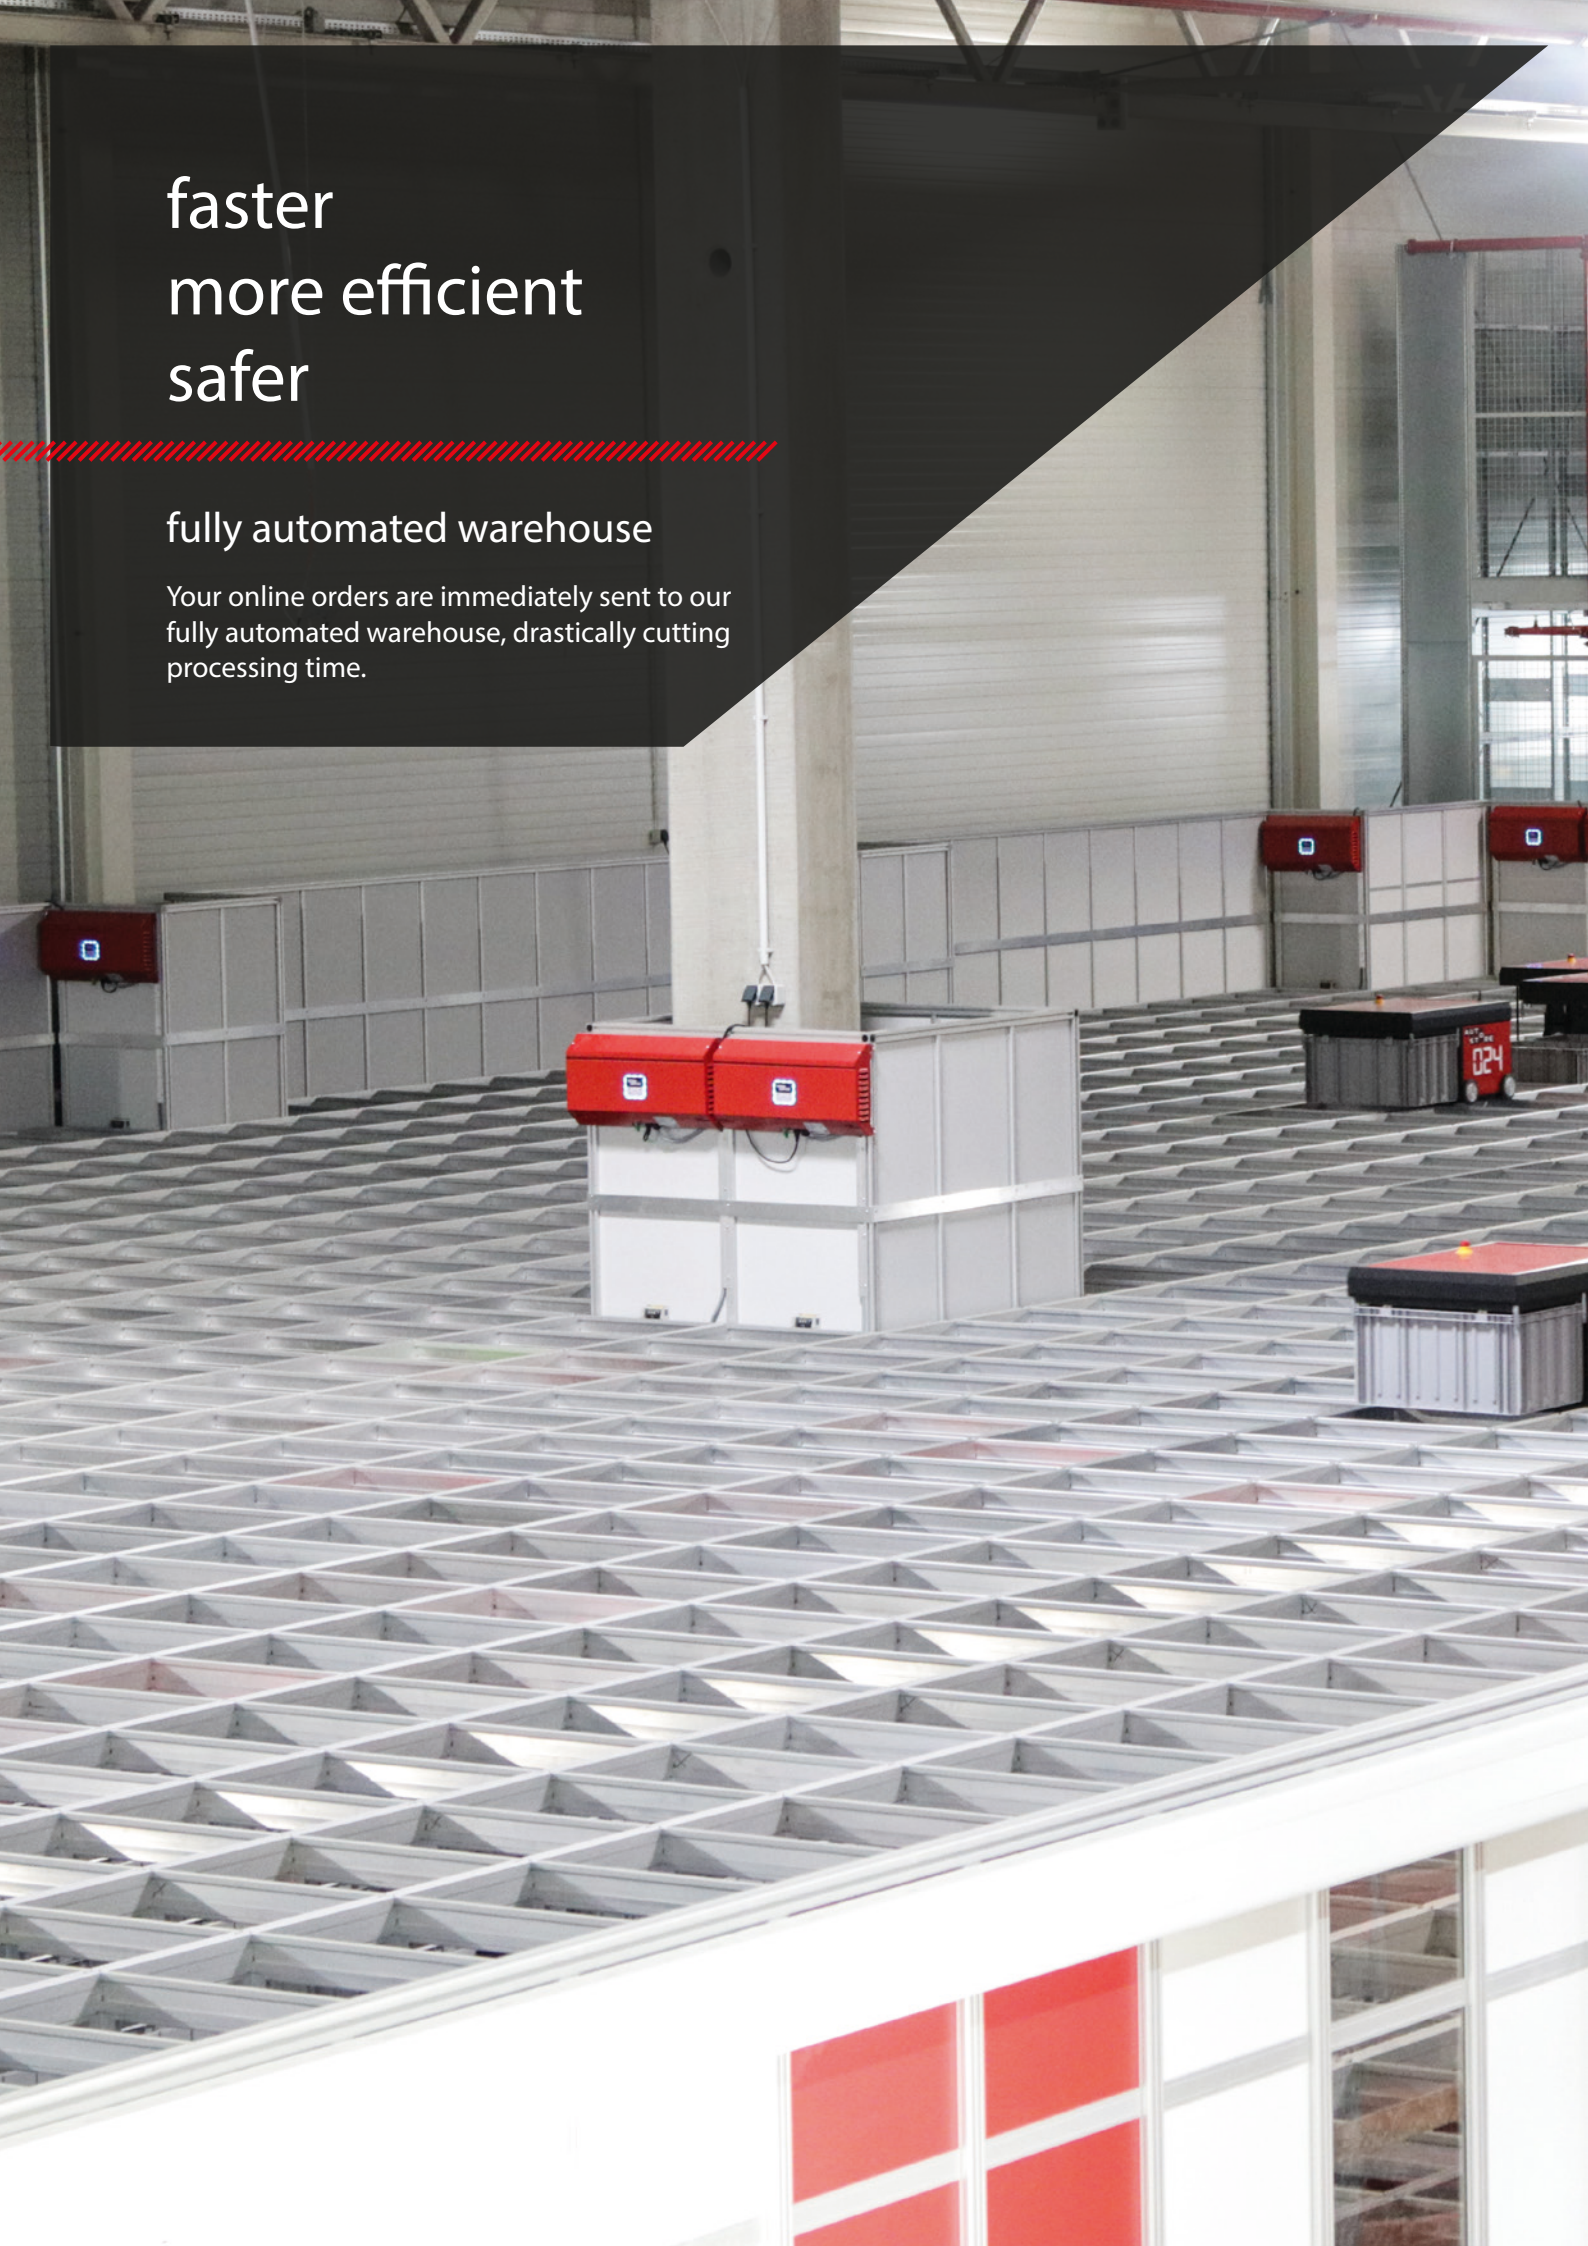

facts

1980	founded by Werner M. Metzger
1993	Marion Metzger joined the company
1995	Isabel Brockmann-Metzger joined the company
1999	started as TecDoc data supplier
2003	installed own online purchasing system www.dispo-metzger.de
2004	connection to TecCom
2008	participation to Partslife
2008	the continuous growth shows results: relocation to our new premises in Stuttgart-Möhringen
2011	expanding of export business
2013	assortment increased to > 20.000 items
2016	market leader with the electronic range in Germany
2017	assortment increased to > 28.000 items
2017	new building nearby the airport Stuttgart with fully automatic warehouse
2018	relocation to the new facilities
2018	125 employees in the METZGER team

fully automated warehouse

Your online orders are immediately sent to our fully automated warehouse, drastically cutting processing time.

4000 m² storage area
1500 shipments / day
30.000 articles
125 employees
fast shipping solutions available
export to 50 countries

THE MOST MODERN TECHNOLOGY FOR OUR CUSTOMERS

Stacking the containers on top of each other creates cells that are extremely close together. This allows up to five times better use of space than any other automatic storage system. In view of growing environmental protection requirements and energy costs, the system impresses with its extreme low power consumption.

Efficiency and energy savings are evident with every movement of goods. No energy is wasted. Each robot not only charges itself at the right time, but also returns charge to its battery every time it lowers a container or reduces speed.

Through this system, we have greatly reduced lead times from order receipt (online, by telephone) to dispatch.

In our high-rack warehouse we keep the goods with which we fill up the fully automatic warehouse

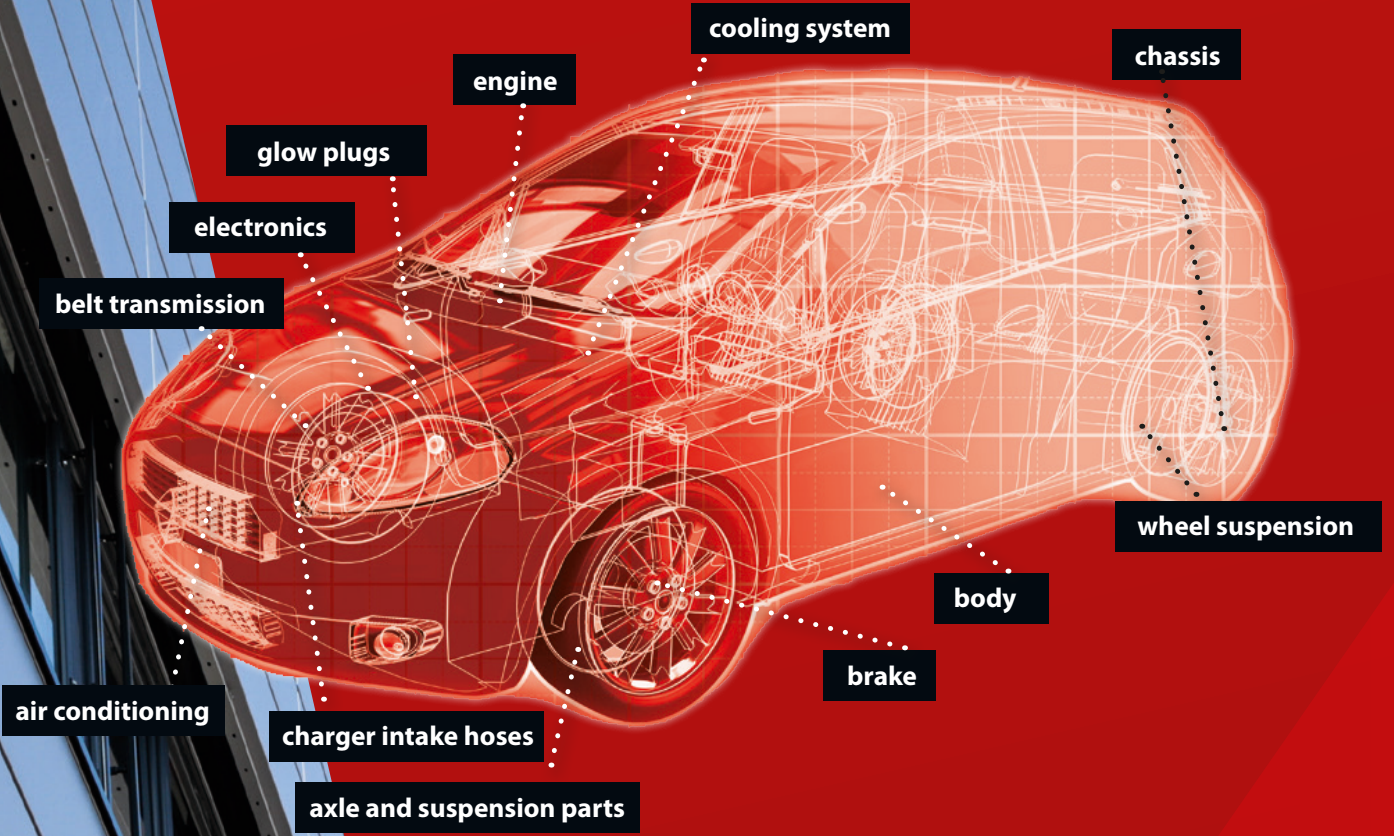

Goods which doesn't fit into the fully automatic warehouse due to their size, are stored ready to hand in our shelf rack area

„Online orders are immediately passed to the system and thus immediately to the customer “

our assortment with around 30.000 articles

is covering the following assembly groups

REPAIR SETS - WIRE HARNESS

ENGINE WIRE HARNESSES - COMFORT SYSTEMS - LIGHTING - DOORS AND TAILGATES

Sustainable and cost-saving repairs of wire harnesses, with the innovative repair solutions from Metzger. They save time in the workshop and are cost-efficient for the customer.

Small damage, major repair!
The plug concept of the wire harness which becomes broken, while the rest of the harness remains intact. The cost of the day wire harness break, at the cable date insulation became fixed.

Repair solutions on the higher:
Construction and quality defects made by manufacturers and when the wires are damaged during the development of the wire harness.

- High flexible cable strands, with silicone instead of the original PVC-cable.
- Long connector made of copper, are resistant against high thermal stress.

Fast and efficient repairs

- All necessary components are included car-specifically
- Easy assembly by the use of crimp connectors
- Water proof joint joints with clamping tubes
- Cable ends are protected by OE in colour and profile.
- No danger of corrosion
- Maximum pre-assembly
- With assembly instructions if practical.

German manufacturer. Produced in highest quality, even above OE for a sustainable repair.

CHARGER INTAKE HOSES

A WIDE RANGE OF NEW COMPONENTS FOR THE MODERN DRIVE MECHANISM

Demisting and the consequences
Today's engines of the passenger car construction follow the trend of the "leaner" concept, "lean" combustion and therefore are more sensitive to the "chamber" effect. A consequence of this is the so-called "chamber" effect, which leads to a high level of thermal stress on the combustion chamber. This leads to a high level of thermal stress on the combustion chamber. This leads to a high level of thermal stress on the combustion chamber.

Assortment with a high market coverage
Metzger Autoteile is offering the complete product group from now on. All charger intake hoses are the original standard original parts, which are included in the scope of delivery of the respective original part.

- Vehicle significant, accurately fitting
- Reliable for every charging pressure to OE requirement
- Resisting the highest pressure loads
- Identification with production data

The range-charger intake hoses from Metzger Autoteile is a professional solution for modern working conditions. Here, we offer a complete overview of the available products.

Convincing service

- Individual, customer-oriented consulting
- Efficient and fast delivery
- Original parts response
- Quick response

quality management suppliers

Through careful product and supplier inspections we assure and guarantee the highest quality standards in our industry. Our product managers ensure this every day.

- » **our pre-suppliers are OE-suppliers or manufacturers for international brands**
- » **all suppliers are ISO certified (ISO9001 / TS16949)**
- » **individual testing if OE or aftermarket parts**
- » **database supported quality analyses**
- » **quality standards of suppliers**
- » **own quality control department**

quality control product inspections

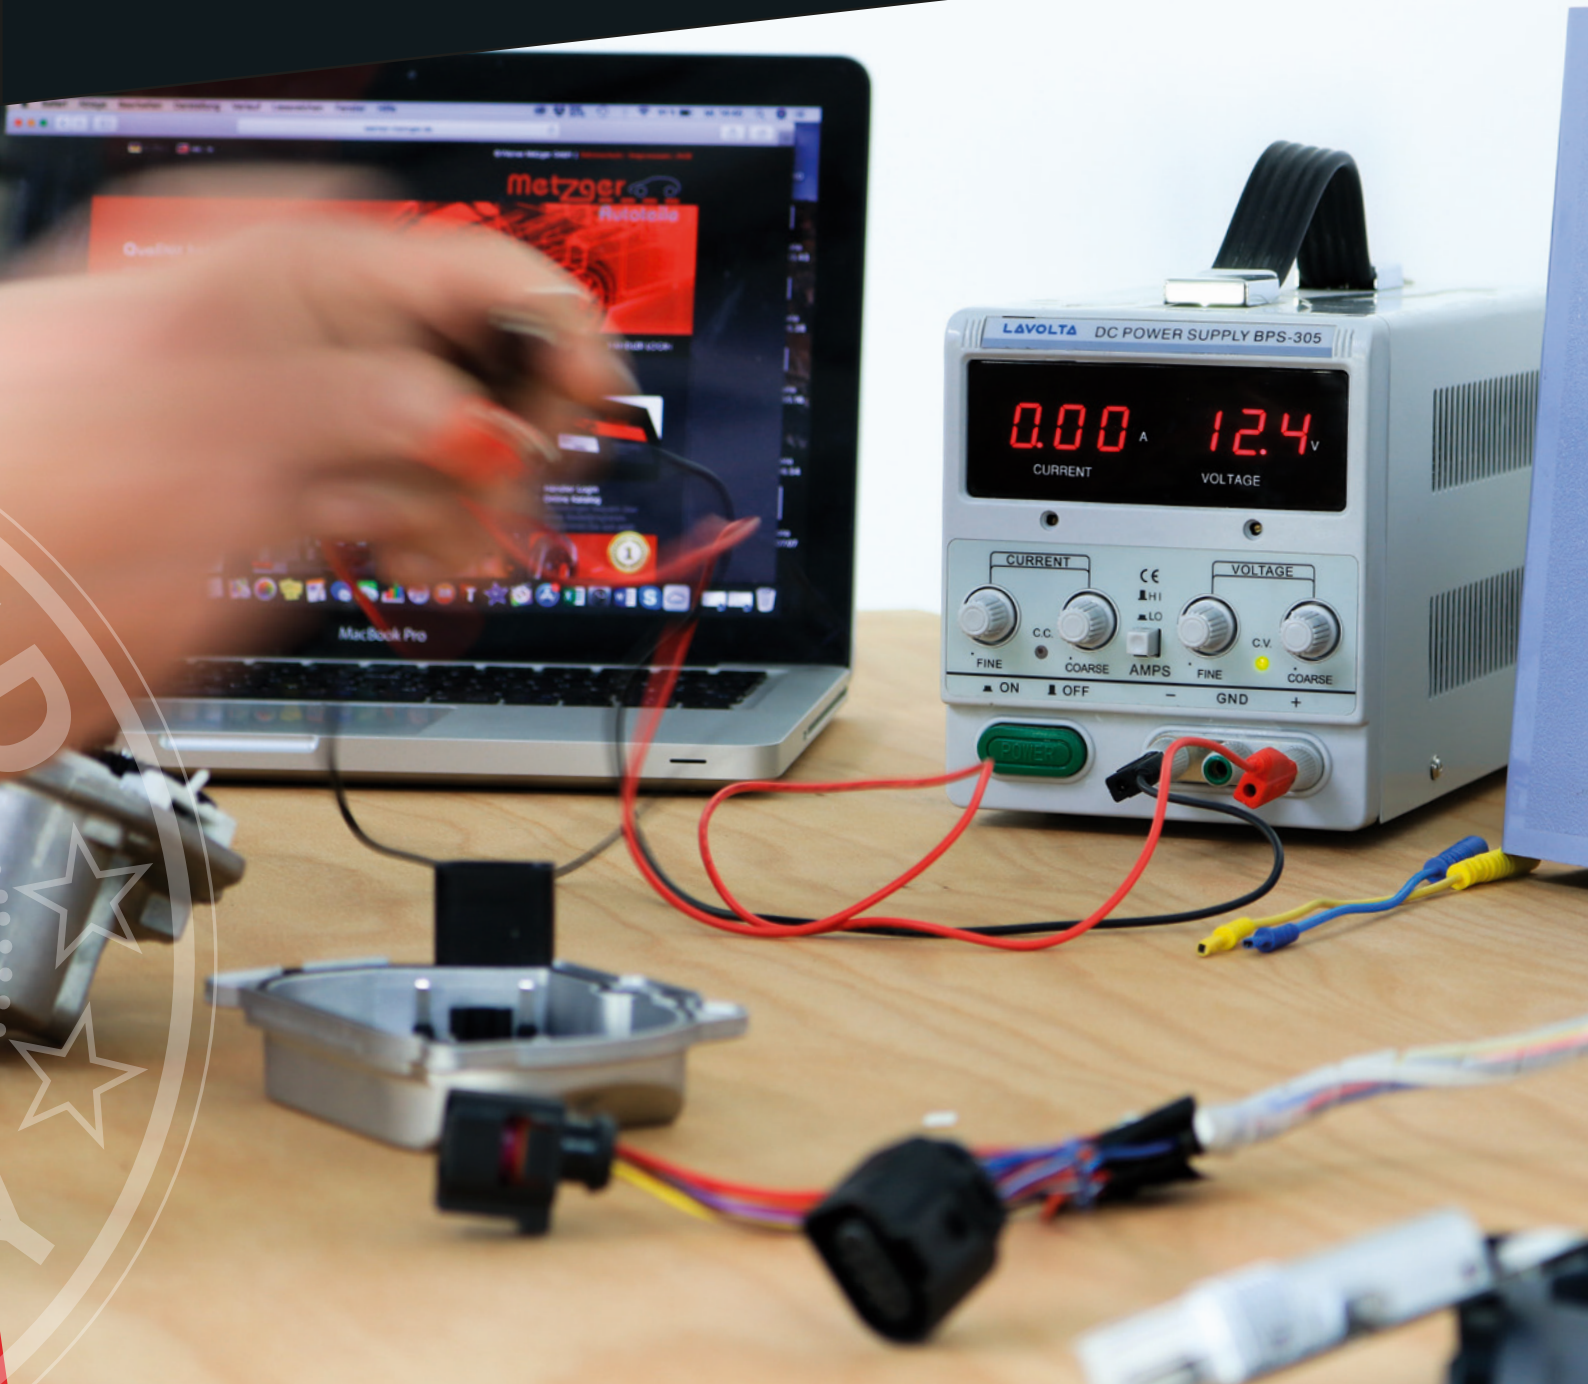

All articles are subject to strict quality requirements and are therefore checked detailed on our premises by QS employees. Only after their OK, the products are added to the sales program.

For additional quality assurance

We carry out part inspections on a random basis in our own testing laboratory. The parts only leave our warehouse after 100 % of passing the test. This is what Metzger stands for.

For your and our safety - for sure!

environmental awareness sustainability

LED technology photovoltaics

We feel responsible for the environment and have therefore installed a photovoltaic system on the roof of our new warehouse.

By the use of LED-light technology in our new building, we only need 35 % of the system's power production for ourselves. So we are completely self-sufficient.
