

LEAK OFF PIPES

Leak off pipes are mounted directly on the injector and return the excessive fuel to the high-pressure pump. These lines must be removed when replacing the injector, but also during other work on the engine. As a result, the connections can break very easily. The hoses also become brittle and cracked over time.

We have a wide range of vehicle-specific as well as universal repair kits in stock.

- **The perfect complement to our injectors**
- **Tested safety and quality**
- **Immediately available**

**METZGER LEAK OFF PIPES:
BEST QUALITY FOR MAXIMUM SAFETY**
